FF100 –Nail Strip Panel

Nail Strip panels keep the seam well above the water runoff. During any expansion or contraction stages, the seam can shift without altering its weatherproofing quality or structural characteristics.

- Integrated clip system eliminates unnecessary roof penetrations
- Optional minor ribs to reduce the effects of oil-canning
- Available in a variety of colors
- 24 Solar Reflectance colors available for increased energy efficiency
- Easy to install panels
- Self-cleaning

- Long lasting
- Can be installed directly over existing composition, eliminating the cost of tear off and allowing for problem free installation during the rainy season.
- Panels hide all screws and fasteners for a clean finish.
- Necessary accessories and trims are available
