Narrow-Batten

The **Narrow Batten** panel is non-structural, architectural panel designed for flexibility and styled after the old style hand seamed look.

The net coverage is variable and usually ranges from 14.5" to 22.5". The **Narrow Batten** is designed to be applied over a solid deck, and can be arched positively or negatively.

- ✓ Installs easily over solid decking with felt or synthetic felt underlayment.
- ✓ Continuous rib lines can run over changes of pitch giving dramatic shadowed look.
- ✓ Batten caps snaps positively over concealed anchor clips for fast installation.

- ✓ Can be used for vertical or inclined applications down to a slope of 3/12 making it ideal for roof, fascia, mansard or soffit applications.

- ✓ Also Available in 16 oz or 20 oz copper, stainless steel, 24ga or 26ga Painted, galvanized or bonderized finish.
